

Web Development Essentials

## **Assignment**

**Back-to-Top Button, and  
Sticky Element**

## Assignment: Back-to-Top Button & Sticky Element

# Requirements / Checklist

For this assignment you must:

- Build on previous exercises and assignments by:
  - Creating a **back-to-top button** that scrolls with the page using the **position** property.
  - Find out how to use the **sticky** position property, and add an element to your website that employs the sticky property.

### NOTE:

Create a GitHub repository named ***css-positioning-examples*** for this assignment.
