

Web Development Essentials

Assignment

CSS Float Layout Pages

Assignment: CSS Float Layout Pages

Objectives

Practice and expand your knowledge of HTML and CSS by creating some pages with layouts that employ floated elements.

Requirements Checklist

1. GitHub Repository

Create a new repository on your GitHub account named ***floats-layout-example***

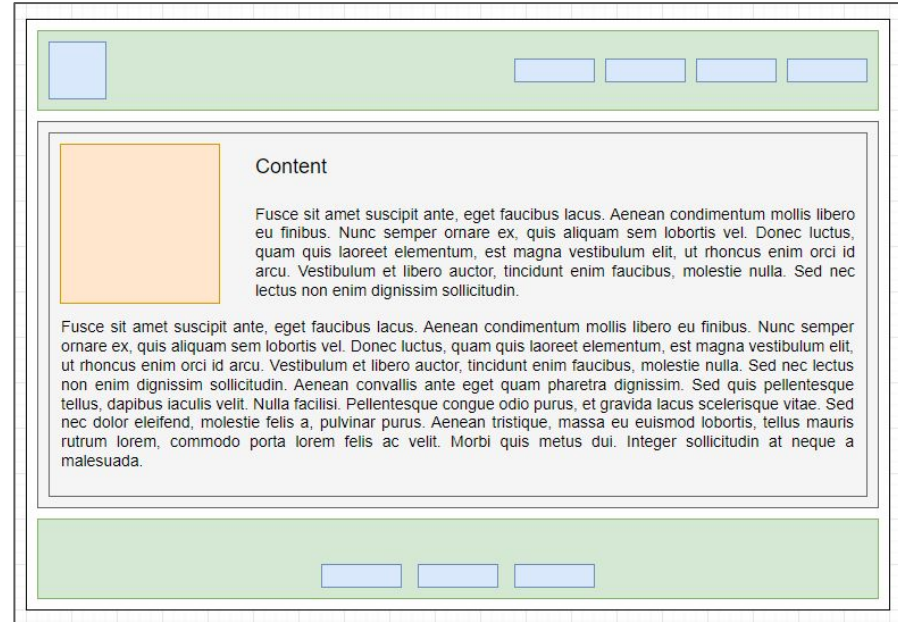

As you work on the assignments (through each step or checklist item), make sure to commit and push to the GitHub remote repository, so that when you finish the assignment the GitHub repository will feature the completed work.

Requirements Checklist

4. Clear Both

Create a page that features two floated elements; one to the **left** and one to the **right**, and a third element with content that clears both floats.

Requirements Checklist

6. HTML Conditions

Use semantic Markup with proper element nesting, as discussed in previous lectures, exercises, and assignments.

7. CSS Conditions

- Use the **border-box** mode with the **box-sizing** property for the CSS Box Model.
- Use all three basic selectors: **type**, **class**, and **id**
- For non-floated elements use only the **block**, **inline**, and/or **inline-block** modes.
